

Re:App & Multistax

Application Modernization with AI

In a Nutshell

Accelerates and simplifies **application modernization** with AI. Combines professional services with multiple AI agents. Delivers results in weeks instead of years, with lower costs and reduced risks.

Key Principles

- Human in the lead: AI supports, humans steer and validate.
- Tool calling ensures security, quality, and integration.
- Continuous reuse of code and processes for long-term value.

Re:Sult

Without AI → 100k+ lines of code → years of work, high costs and high risk.
With Re:App → 100k+ lines of code → weeks of work, lower costs and minimal risk.
